# An Amazingly Simple Approach to Interoperability
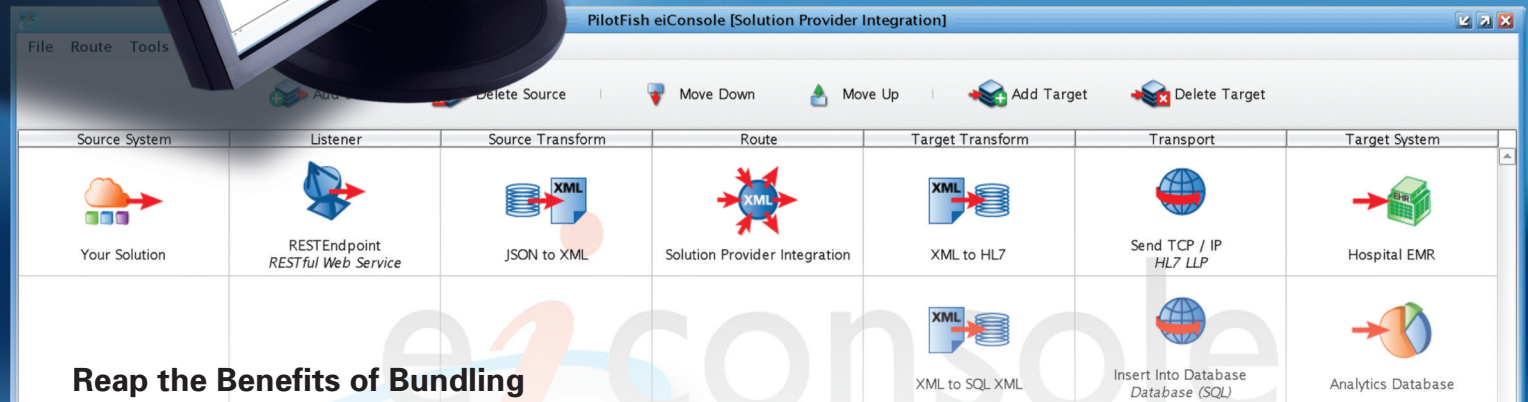

(End-User, Bundling and Reseller Licensing Options to Meet Any Business Requirement)

PilotFish Interface Assembly Line

Rapid Implementations and Reusable Interfaces

Whether you are a provider of on-premises software, cloud solutions, medical equipment or devices – integration is a common barrier to adoption and value creation. PilotFish slashes implementation times and eliminates risk by dramatically simplifying the technical challenges associated with interoperability.

Reap the Benefits of Bundling PilotFish with Your Solution

- Instantly make your offering "interop-capable" out-of-the box
- Remove interface development and maintenance from the critical path
- Build a reusable library of interfaces for common systems and scenarios
- Clone, configure and test new connections in minutes
- Simplify deployment with a lightweight technology stack

Leverage Proven Technology, Today and Tomorrow

- Take advantage of the PilotFish interface engine that has been successfully deployed across every area of the healthcare ecosystem
- Gain support for common formats of today (HL7 2.x, EDI X12, CCDA etc.,) and tomorrow (FHIR, EMR-specific REST APIs)
- Benefit from an extensible and modular architecture that offers unlimited flexibility and adaptability to future technologies
- Prepare for success with an engine finely tuned for performance and pre-positioned to scale

Briggs Healthcare - Solution Provider

Briggs is bundling PilotFish with its solution to offer eBriggs® Powered by PilotFish - the all-in-one solution to paperless forms workflow. The PilotFish engine offers Briggs customers powerful interoperability features to not only save, retrieve and print these forms, but to also integrate these into their EMRs and other systems and processes.
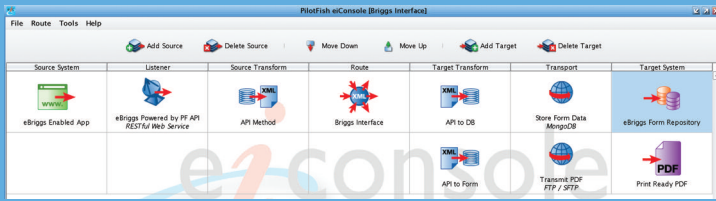

DSS, Inc. - EMR Vendor

DSS is bundling PilotFish with its Juno EHR system to provide the rapid and broad interoperability required in healthcare systems today. By leveraging PilotFish, Juno EHR can seamlessly integrate with existing and new systems no matter what data formats or communications protocols are required.
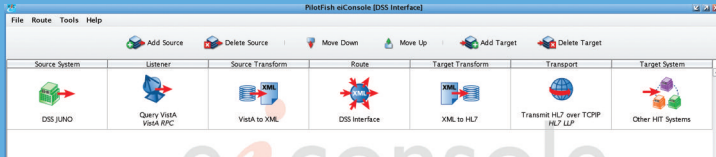

TouchPoint Medical - Medical Equipment Manufacturer

TouchPoint is bundling PilotFish with its automated medication dispensing carts and cabinets. PilotFish provides the ability to offer the advanced technology, automated processes, flexibility and rapid development tools needed to effectively integrate with the ever-evolving array of IT systems and equipment found in world-class hospitals.
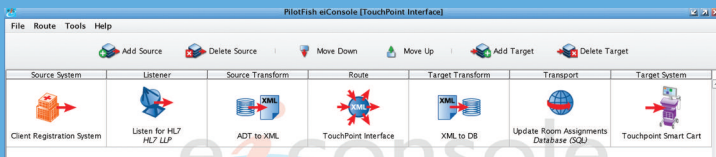

Interfacing ANYTHING to ANYTHING Made Easy With PilotFish's Graphical 7 Stage Assembly Line

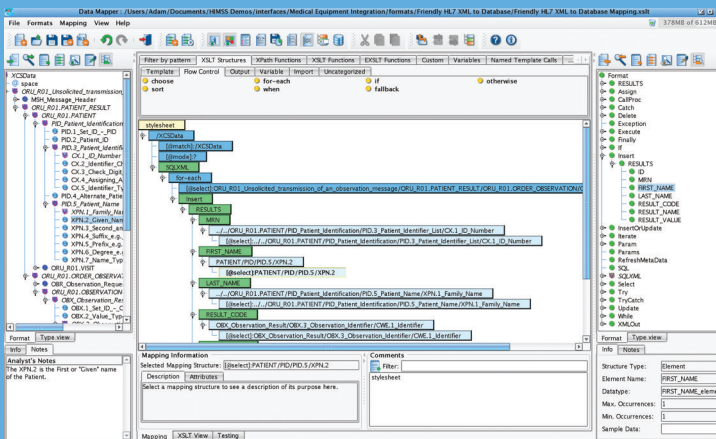

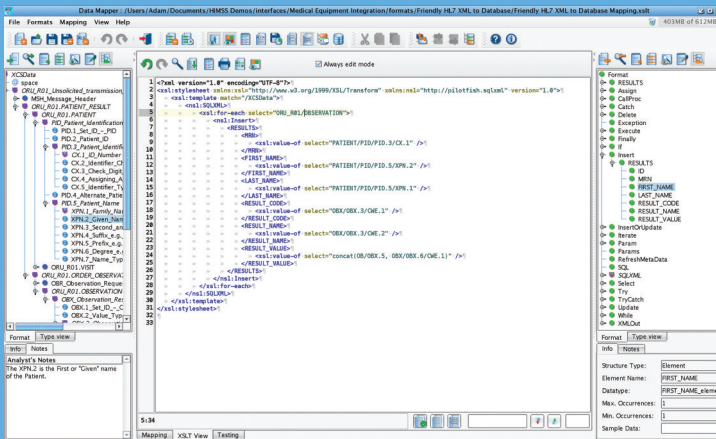

Sample Interface 1

Sample Interface 2

Sample Interface 3

Data Mapper Graphical View

Data Mapper XSLT View

Configure Interfaces, Don't Code

- Reduce maintenance through an assembly line process that results in fewer variations between interfaces

- Natively "Self Documenting" to eliminate dependencies on who built an interface

- Facilitate 80% of interface development completed by business analysts

Fast and Easy Data Mapping

- Point, click, drag & drop to graphically create even complex mapping logic

- View intuitive data mappings rather than struggling with spaghetti-like line drawing tools

- Eliminate the requirement for custom Javascript and hard-coded transformations

- Switch seamlessly between graphical mapping and standards-based XSLT views

VAR Pricing to Suit Your Business

- **PilotFish Bundling License**
  Bundle an eiPlatform with your software or solution to enable faster implementation and integration

- **Full Value Added Reseller License**
  Resell licenses of the most comprehensive systems integration solution

- **Value-Based Licenses**
  Ensure your ROI with flexible, value-focused royalty schedules

(Enjoy unlimited access to PilotFish products for related development, testing and demonstration purposes)

No Risk, Try Before You Buy!

- Free 90-day trial download with online training

- Proof of Concepts (POC) available to qualified prospective partners
